

CERTIFICATE

Manufacturer according to AD2000 - Merkblatt HP 0 in connection with DIN EN ISO3834-3

We confirm that the company

SEICO Industrie-Elektrowärme GmbH
D-30851 Langenhagen

fulfills the preconditions as manufacturer of pressure vessel parts according to AD 2000-Merkblatt HP 0/HP100R as well as the standard quality requirements for welding according to DIN EN ISO 3834-3 in consideration of directive 97/23/EG (PED).

The validity range of the verification and its validity are to be seen in our report 1042S500180 in its version valid in each individual case.

The manufacturer disposes of

- Equipment for the proper processing of the materials and for the execution of the necessary tests
- Responsible supervisory staff and specialized personnel for the manufacture
- A quality management system with which the proper manufacture of pressure vessels and pressure vessel components as well as the maintenance of the requirements indicated in the technical regulations are ensured and which meets the standard quality requirements for welding according to DIN EN ISO 3834-3.
